EDUCATION AND ACHIEVEMENT

Bachelor of Science, Computer Science Major (Co-op) Sept 2022 - Present
Minor in Mathematics
University of Manitoba
GPA: 3.78/4.50
Relevant Coursework: Software Engineering, Artificial Intelligence, Machine Learning, Application Security, Applied Linear Regression
Dean's Honour List | *University 1* 2024

TECHNICAL SKILLS

Languages and Frameworks: Java, Python, JavaScript, HTML, CSS, C, C++, TypeScript, R, Node.js, Vue.js
Development Tools and IDEs: Visual Studio Code, Android Studio, Version Control (Git/GitLab), Docker, RStudio, Figma
Databases: MSSQL, PostgreSQL, MySQL, SQL Server
Concepts and Methodologies: SDLC, Agile Practices, REST APIs

RELEVANT EXPERIENCE

Computer Science Department, University of Manitoba 2025, 2026
Data Structures and Algorithms Grader Apr - Jun 2025, Apr 2026 - Present

- Review over 80 students' Java code with attention to detail and consistency, ensuring fair and accurate grading across all submissions.
- Provide students with comments explaining errors and areas for improvement, irrespective of correctness, and help strengthen their proof writing and code performance.

Application Security Grader Apr - Jun 2026

- Read and analyzed Python, SQL and C code for programs relating to buffer overflow attacks, cryptography, and secure query execution, ensuring students correctly identified and addressed vulnerabilities.
- Handled student grades and academic information with complete confidentiality, upholding academic integrity standards.

PROJECTS

Interactive Website (Portfolio) May 2026
TypeScript, CSS, HTML, Git *Personal*

- Built a responsive website with personalized visuals and developed skills in responsive design, styling, and interactive development.

Campus Shenanigans Android Application Jan - Apr 2026
Java, SQL, Android Studio, SDLC, Agile Practices, GitLab *Academic | Software Engineering I*

- Collaborated in an Agile team across 3 iterations to develop an Android application for campus event tracking, using SDLC practices and a 3-tier architecture (UI/logic/database) to support separation of concerns.
- Implemented version control via GitLab, reviewed merge requests, and conducted meaningful peer code reviews according to standards discussed within the team, helping maintain code quality across contributions.
- Created and maintained the group's architecture diagram, which contributed to a cleaner code structure and fully isolated layers for scalability and maintainability.
- Wrote iterative unit tests for the logic and persistence layer and maintained at least 80% unit coverage throughout development.

NBA Analytics Sept - Dec 2025
Java, SQL, Agile Practices, GitLab *Academic | Databases*

- Developed a CLI application with two team members to analyze NBA player performance from over 20 data tables and designed a normalized 13-table relational database that supports CRUD operations.
- Implemented the pagination feature by breaking down larger query results into smaller, readable sections which improved the usability of the command line.

LEADERSHIP AND EXTRACURRICULAR

WISE Kid-Netic Booth Volunteer

May 2026

Science Rendezvous, University of Manitoba

- Explained computational thinking through a mouse maze activity and translated programming concepts into child-friendly explanations, which made concepts easier to understand and increased booth participation.
- Adapted challenge difficulty based on each child's age and understanding, while also motivating them to attempt more difficult problems and build confidence in problem-solving.

Internal Executive

May 2025 - Apr 2026

.devClub, University of Manitoba

- Recorded weekly meeting minutes, and club decisions, leading to a more consistent record of club documents.
- Facilitated changes to the club's constitution and introduced four new councillor roles to reduce executive workload and for better distribution of responsibilities across the team.

University of Manitoba Women in Computer Science

2024 - 2026

Website Committee Member

Nov 2024 - Apr 2026

- Contributed to the club's code through organized Git development workflow, keeping code readable and maintainable for other contributors.
- Reviewed and improved the existing codebase and implemented changes that enhanced website accessibility for users.

Outreach Committee Volunteer

Nov 2024 - Feb 2025

- Taught game development using Gamefroot to students in grades 5-9, explaining programming concepts and providing guidance to promote an interest in coding.

ADDITIONAL WORK EXPERIENCE

SettleEase Canada Foundation

2024, 2026

Non-profit organization empowering immigrants and BIPOC communities through employment, housing support, economic inclusion, and community-building initiatives

Communications Intern

Jun - Aug 2026

- Planned and created topics and posters for the organization's new 12-month workshop series, which connects immigrants with speakers and information related to employment, business, and life in Canada.
- Translated organizational activities and information into audience-appropriate digital content which increased engagement and kept members informed about upcoming programs.
- Created and edited the organization's first Youth Day highlight video, bringing past organization volunteers together to share their experiences and messages with youth.

Grant Application Research Intern

Jun - Aug 2024

- Identified immigrant community needs, researched possible solutions, and discussed grant proposal ideas with colleagues and board members, contributing to programs that were later delivered by the organization.
- Developed and submitted successful grant applications, including budgets and financial statements, and secured funding to support initiatives.
- Documented records of grant decisions including application progress, information sessions, requirements, and deadlines which helped new hires quickly understand the workflow.

Seasonal Sales Associate

Jun - Aug 2026

Banana Republic Factory

- Learned about the store's merchandise and made useful recommendations based on customer needs and provided a more personalized experience.
- Organized and restocked clothing items, keeping sales floor clean and presentable.
- Trained a newly hired Sales Associate on customer communication and product knowledge, which helped them become more comfortable and independent in their role.
